1. The abstract of the disclosure is objected to because it must be on a separate sheet. Correction is required. See MPEP § 608.01(b).

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 32-48 are rejected on the ground of nonstatutory obviousness-type

double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 7,020,517.

Although the conflicting claims are not identical, they are not patentably distinct from each other because at least one claim of the present application is obvious over at least one claim of the '517 patent. The claims of the present application are considered to be an obvious broadening of the claims of the parent patent.

Claim Rejections - 35 USC § 103

4. Claims 32-38,41-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine et al (6,058,328) in view of Collins (5,782,873).

Levine teaches all of the subject matter of the above claims except for the explicit mention of an environment enhancement generator. Collin teaches the use of such a generator. It would have been obvious to combine the teachings of Collins with the device of Levine since such a combination is a combination of known prior art elements which would yield a predictable result, with no change in their respective functions.

5. Claims 39,40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Levine et al (6,058,328) in view of Collins (5,782,873) and further in view of Klemic et al (2004/0168912).

To use the high resolution patch sensor of Klemic would have been obvious since such has been shown to be effective in sensing small signals from bio tissue, as taught therein.
